

World Hearing Day

Signs of Hearing Loss

1. You hear but do not always understand what a person is saying.
2. You mishear and confuse words, particularly consonants (e.g. deaf/debt/depth).
3. You notice that you hear better face-to-face in a quiet place, but not when the person is in another room, or not looking at you.
4. You feel the need to turn up the volume of the TV and radio.
5. You have a great deal of difficulty hearing when there is background noise or in a reverberant room (such as a large hall or a gym).
